Kurt Vise Conversion Kits

Kurt Workholding offers a variety of kits to upgrade or rebuild vises you may already own. Affordable, and easy to use, automation upgrade kits can turn a DX6 manual vise into an Air or Hydraulic vise in under an hour. Double station HDL vise kits can eliminate the clutch for easier cleaning and/or convert the screw/nut assembly to accept CarveSmart jaws. HD690 jaw sets can be replaced with CarveSmart jaws. You will see greater accuracy and quicker changeovers when using CarveSmart soft jaws with the HD690CST jaw kit.

DX6 Manual to DX6H Hydraulic or DX6A Pneumatic

- Easily convert a manual DX6 vise to a hydraulic or pneumatic model.
- Pneumatic DX6-AKIT uses shop air.
- Hydraulic DX6-HKIT uses a Kurt Hydraulic Pump.
- Works on all DX6 vise models
- Inexpensive automation upgrade for existing vise models.
- Kits also available for 3600V & HD690.

HDL6 Screw Assembly to TL6 Screw Assembly

- Replaces HDL6 screw/nut assembly with the TriLock Vise Screw and Nut Assembly.
- Includes CarveSmart movable and stationary jaws.
- An easy-to-clean and service upgrade for the HDL(M)6 vise.
- Eliminates HDL screw/nut clutch assembly.
- More part-holding options with multiple CarveSmart dovetailed 6-inch jaw options.

HD690 to HD690CST with CarveSmart Jaws

- Quick and easy conversion from standard Kurt jaws to new CarveSmart movable and stationary jaws.
- Jaws can be flipped 180 degrees.
- Talon edge-gripping machined into jaws.
- More part-holding options with multiple CarveSmart dovetailed 6-inch jaw options.
- Quicker changeovers with greater accuracy—jaw relocation +/-0.0003".
